World's Premier Billiard Cloths

There is a growing demand for quality by both professional and amateur players today. The wide range draw, follow, piqué, fouettée and massé shots they practice demand a reliable and precise response from the cloth and cushions to guarantee a perfect balance between performance and response.

At Gorina to meet these challenges we first developed state of the art technological processes. Blending this technology with the experience brought by the famous masters of billiards we have then applied the results of our research into all GORINA CLOTH today.

That's why GORINA CLOTH is used for Pool, Snooker and Carom in the highest level competitions and tournaments all over the world today.

Worsted cloth as we know it was first created in 1913, the invention of "high draft" allowed perfect yarns. In 1920 GORINA created the Granito A cloth with worsted wool, to be used for billiards in Spain. GORINA had its own worsted spinning factory in 1952. In Europe in 1965 GORINA revolutionized the game with

the introduction of Granito A, the fastest cloth in the world. GORINA changed the course of Pool and Billiards forever.

The evolution continues to this day with two different processes of cloth manufacturing: traditional carded wool and worsted wool.

Nowadays, there's no discussion in using worsted cloth for Carom and carded wool with short directional nap for Snooker.

Regarding pool, GORINA has two visions: a slow carded wool cloth that needs a higher shot and finesse or a worsted cloth in a more predictable surface that make game easier and more durable.

At the European textile DNA stands Sabadell, near Barcelona, home to the Spanish wool specialization and the main headquarters and manufacturing of GORINA CLOTH.

GORINA's best game:

1. Highest quality worsted wool to give a flatter and more durable surface.
2. Easy installation and excellent response to tension –it doesn't get loose.
3. Gives consistent speed to the ball –does not slow down over life of cloth.
4. Bionic-finish treatment protecting against moisture, stains and grease.
5. The perfect finishing of the cloth protects from stains or prints made by massé or jump shots.
6. Perfect surface texture for complete cue ball control.
7. No grooving or pilling; perfect accuracy on all shots and angles.
8. Excellent traction for draw and follow shots.
9. The widest range of colors for all games: from classical greens to bright tropicals and beyond.
10. Gorina cloths have the best price-quality relation in the market.
